

We are happy to invite all of you to the 2020 Spring Meeting/3rd Cologne Aging Conference – From Mechanisms to Disease, which will be hosted by the University of Cologne, Germany, on March 18-20, 2020. This biennial meeting has developed into the leading Cologne conference series on the Biology of Aging. For the 2020 conference, we are happy to be hosting internationally leading scientists who will cover various topics of aging research, including:

- mechanisms of epigenetics and DNA damage
- tissue regeneration and senescence
- metabolism and mitochondrial biology
- proteostasis and neuronal aging

Please visit spring-meeting2020.uni-koeln.de to register for the Conference and to submit a poster abstract. The registration is free-of-charge.

Two poster sessions will be held at the Conference, during which the participants will have the opportunity to discuss and showcase their research; and to compete for one of the poster prizes. The number of poster abstracts will be limited to 200 and the abstracts will be selected on a 'first come, first served' basis.

We are looking forward to welcoming all scientists with a keen interest in aging research to Cologne.
