

IMMUNO-ONCOLOGY (IO) aims at better understanding how the body's immune system finds and destroys foreign substances and aberrant cells to help fighting cancer. At the MSNZ Würzburg, we use in vivo tools as well as organoid technology ('mini organs') to study cancer and explore new avenues for cancer immunotherapy.

Technical Assistant (f/m/g) 2/054  
Mildred Scheel Nachwuchszentrum - IZKF  
Vollzeit, befristet, baldmöglichst

As part of these efforts, we are looking for a

**Technical Assistant**

for projects at the Mildred-Scheel Early Career Centre (MSNZ) for Cancer Research in Würzburg, Germany, supported by Deutsche Krebshilfe. The position will be associated with the laboratories of Angela Riedel and Kai Kretzschmar.

We are looking for

highly motivated individuals with experience in the management and organization of research laboratories (documentation, protocols, ordering consumables, preparing stock solutions, helping prepare animal ethics applications), and training in cell culture, flow cytometry, molecular biology techniques and animal work including husbandry (FELASA certificates), ideally also histology and organoid technology.

The position is available

from May/June 2020, based on TV-L salary and initially funded for two years. It will be a shared position between the two laboratories.

The University of Würzburg and the University Hospital Würzburg are equal opportunities employers. Women are encouraged to apply. Applications of people with special needs are particularly welcome.

Please send applications

including a cover letter, CV and contact information of references as a single PDF file via e-mail to Dr. Martin Czolbe ([Czolbe\\_M@ukw.de](mailto:Czolbe_M@ukw.de)). The deadline for the application is **April 30th 2020**.
